

Calculator:

E.g. - if trash disposal costs \$85/ton and organic soil can be sold for \$40/ton then the net swing to the plus = \$125/ton!

Cities/towns: go from losing money at the landfill to making money!

Save \$ & Save the environment!

(What will you do when your land-fill is filled?)

The more trash is composted, the less trash needs to be land-filled...

Land-filled trash is expensive!

Composted trash makes \$\$\$!

1447 San Pablo Dr. Lake San Marcos, CA 92078

USCOMPO

Compostable Products

Trash bags, carrier bags, grocery bags, cutlery - knives, forks, spoons, plates, cups, meal trays, golf tees, farm drip-lines, mulch film, flower pots, etc.

Us Compo Products are ideal For:

- "Pay-per-bag" trash programs
- "Tag-per-bag" trash programs
- "Closed-loop systems"

For Example:

- Schools
- Hospitals
- Police
- Fire departments
- Universities
- Military installations
- Farming operations
- Golf courses
- Restaurants
- Stadiums
- Concert Halls

Freight Benefits:

Recycling trucks carry a lot of air!

Green waste trucks have compactors the result is less air wasted, more lbs. carried. Savings: Green waste trucks carry much more weight than recycling trucks, saving money.

Land-Fill Savings:

Once a land-fill is filled – that's it!

Then where do you go?

You can truck out to a more distant land-fill, if they let you.

Now you have incurred additional trucking and disposal expense.

By diverting a growing portion of the waste stream into green/compost then the life of your local landfill can be extended.

With US Compo:

Food scraps are ok!

There is no need to segregate Food - it's compostable!

Think of the savings involved. Food scraps are expensive to dispose.

Everything From cutlery, Food, cups and plates, goes into the **US COMPO TRASH BAG**.

The **US COMPO TRASH BAG** goes out with the green waste. Green waste is composted.

COMPOSTING
CREATES SOIL.

SOIL CAN BE SOLD
FOR PROFIT.

OUT OF SOIL
COMES FOOD.
